

Sensitive Baby Custom Care Guidelines

ATTENTION: the custom care guidelines require the instructions below be followed before and throughout the use of this doll

1 Put your doll in a freezer bag and place the bag in a freezer that is 0° F or colder for 24 hours.

2 Wash seperately in cold water on delicate cycle with mild detergent. Do not use bleach or fabric softener*. Tumble dry on low heat. Allow the doll to cool before giving Sensitive Baby to your child.

3 Your baby can hug, cuddle or sleep with our doll and you can feel confident that the allergens have been kept to a minimum!

4 Repeat this process every 4 weeks.

*We suggest the use of a fabric wash and dry bag, as used in delicates, to keep our doll fresh looking through this process.

NOTE: please read and retain this package as a reminder to repeat this process every 4 weeks

**Sensitive Baby is part of the Goldberger family of dolls.
Look for them all!**
